## SUMMARY

Medical virtual administrative assistant with 5+ years in U.S. healthcare back-office work: nearly 3 years with a U.S. eye care practice (chart prep, EMR records, and insurance eligibility for NJ, PA, and DE patients), and before that 2 years in prior authorization at Optum, then a year as the team's subject matter expert. Built Excel, Outlook, and Word macros that cut daily schedule prep from about 3 hours to about 1. Available full-time or part-time on UK or US business hours.

## EXPERIENCE

**Medical Virtual Administrative Assistant (Back-Office)** | Remote | Nov 2023 - Oct 2026
*Resident Eye Care Associates*

- Pre-charted 50+ patient charts a day in Compulink ahead of physician schedules across a network of 50+ partner facilities.
- For each chart, reviewed medical history, entered allergies, diagnoses and ICD-10/CPT codes, and checked medication and order history for conditions including diabetes, glaucoma, and multiple sclerosis.
- Ran 50+ insurance eligibility and benefits checks a day across Availity, NJMMIS, Davis Vision, and March Vision for NJ, PA, and DE patients, confirming coverage before appointments.
- Checked patient status (admitted, discharged, deceased) and medications in PointClickCare for the 10-20 facilities on each day's physician schedule.
- Ran about 20 diagnosis-based record look-ups (PDPM) a day across facility charts.
- Sent 25+ templated notifications a day to outside facilities to schedule and confirm physician visit dates.
- When main tasks were done, reviewed 10-15 pages of Explanation of Benefits (EOBs) a day, 10-20 patients per page, matching dollar amounts to CPT codes and flagging deductible or POS 11 cases to the client.
- Noticed facilities missing the heading doctors see on their schedule, and added the missing ones on my own for consistency. My supervisor noticed before I mentioned it.
- Redesigned the clinic's facility flyer. The client adopted it and it went to every partner facility.
- Built three Excel, Outlook, and Word macros: schedule drafts for 18 doctors (1-10 facilities each), notifications for 50+ facilities, and doctor-visit flyers with the facility name and date filled in.
- Cut daily schedule prep from about 3 hours to about 1 and sent 25+ notifications a day at a fast pace with high accuracy.

**Subject Matter Expert / Assistant Team Leader** | Nov 2022 - Oct 2023
*Optum | Cebu City, Philippines (Hybrid)*

- Promoted to a leadership-track role after two years of prior authorization work on both phone and back-office queues.
- Trained and coached 10+ agents on documentation accuracy and case tagging, covering up to 3 teams of 10+ agents at a time. One of those teams ranked 1st of 5.
- Trained 10+ new hires on the same tools used in production.
- Audited 10+ agent cases a day against standard procedure and flagged the ones that did not follow it.
- Tracked team KPIs (adherence, average handling time, QA, attendance) in daily and weekly trackers I built, and ran weekly performance meetings with leadership, daily when needed.
- Handled 1-5 backend case escalations a day.

**Customer Service Representative, Prior Authorization** | Nov 2020 - Nov 2022
*Optum | Cebu City, Philippines (Hybrid)*

- Processed 30-50 inbound prior authorization requests a day from providers by phone and fax across 8 U.S. states.
- Verified eligibility, provider details (NPI, TIN), and CPT codes, then set the outcome: no PA required, approved, or routed for RN review. Included urgent, out-of-network, and peer-to-peer cases.

## EDUCATION

Bachelor of Science in Computer Engineering, STI College Surigao (Aug 2019)

## CERTIFICATIONS & TRAINING

- HIPAA Certified, Biologix (2024, renewed 2026)
- Virtual Assistant Training: Ready To Round, 360MVA, VA Of The Future (2024)
- AI Training, Claude Academy: AI Fluency, AI capabilities and limitations (2026)

## SKILLS

- Chart prep: pre-charting, allergy and diagnosis entry, medication and order history review
- EMR/EHR: Compulink (patient creation, demographics, encounters, ICD-10/CPT coding, scanning, referrals, reporting), PointClickCare (census and status tracking)
- Insurance eligibility and benefits verification: Availity, NJMMIS, Davis Vision, March Vision
- Prior authorization case documentation and outcome determination
- Patient records management, record audits, QA checks, HIPAA-compliant handling of confidential information
- Microsoft Office (Word, Excel, PowerPoint, Outlook), including Excel, Outlook, and Word macros
