PROFESSIONAL SUMMARY

Healthcare administrative and insurance verification specialist with 5+ years of remote experience, including 3 years supporting a U.S. eye care practice through EMR/EHR documentation, patient record management, and multi-platform insurance eligibility verification, plus 2 years in prior authorization case documentation for a major U.S. health plan (Optum). Deep hands-on experience with ophthalmology-adjacent charting (glaucoma, diabetic retinopathy, multiple sclerosis) and cross-platform insurance verification (Availity, NJMMIS, Davis Vision, March Vision). Reliable, independent, and comfortable working full-time on UK, US, or AU business hours.

CORE SKILLS

- Ophthalmology-adjacent chart prep: pre-charting, allergy/diagnosis entry, medication and order history review for glaucoma, diabetic retinopathy, and multiple sclerosis cases
- Electronic Medical Records (EMR/EHR): Compulink (patient creation, demographics, encounters, ICD-10/CPT coding, scanning, referrals, reporting), PointClickCare (census & status tracking)
- Insurance eligibility & benefits verification across multiple platforms: Availity, NJMMIS, Davis Vision, March Vision (NJ, PA, DE patients)
- Referral and authorization processing; EOB review and CPT code matching
- Prior authorization case documentation and outcome determination (approved, no PA required, routed for RN review)
- Patient demographic & records management, digital filing, record audits, and QA checks; medical terminology, ICD-10/CPT familiarity, HIPAA-compliant handling of confidential information
- Google Workspace, Microsoft Office (Word, Excel, PowerPoint, Outlook); built Excel/Outlook/Word macros to automate recurring admin work

PROFESSIONAL EXPERIENCE

Medical Virtual Administrative Assistant (Back-Office)

Nov 2023 – Jul 2026

Resident Eye Care Associates (dba RTR Eye Care Clinic)

- Maintained and updated patient records daily across Compulink and PointClickCare, verifying admission, discharge, and status changes for 15–25 partner facilities.
- Pre-charted 50+ patient charts per day ahead of physician schedules, reviewing medical history, entering allergies and diagnoses, and checking medication and order history for conditions including diabetes, glaucoma, and multiple sclerosis.
- Performed 50+ insurance eligibility and benefits verifications per day, cross-referencing Availity, NJMMIS, Davis Vision, and March Vision portals for NJ, PA, and DE patients to confirm coverage before appointments.
- Processed medical documentation including referrals, patient demographic updates, consent records, and physician dictation, entering diagnoses and corrections directly into patient charts.
- Reviewed Explanation of Benefits (EOBs), matched dollar amounts to CPT codes, and flagged deductible or POS 11 cases to the client for billing accuracy.
- Coordinated with outside facilities via templated correspondence to schedule and confirm physician visit dates, and conducted diagnosis-based record look-ups (PDPM) across facility charts.
- Identified and independently resolved a facility record-update inefficiency by consolidating entry into grouped headings, and designed and built the clinic's redesigned facility flyer, adopted for ongoing use.
- Designed and built three automations using Excel, Outlook, and Word macros: physician schedule drafts for 13 doctors across 1–10 facilities each, facility notifications for 50+ facilities (25+/day sent error-free), and doctor-visit flyers with auto-renamed facility/date fields. Cut daily schedule-prep time from 3 hours to 1.
- Maintained strict confidentiality and accuracy while working independently on U.S. business hours; engagement ended due to a client-wide cost reduction, not performance.

Subject Matter Expert / Assistant Team Leader

Nov 2022 – Oct 2023

Optum

- Promoted into a leadership-track role supporting new agents, building on two years of hands-on prior authorization experience across both phone and back-office work.
- Served as team resource for workflow and documentation questions; trained and coached 10+ agents on documentation accuracy and case tagging to meet U.S. healthcare standards, supporting up to 3 teams simultaneously.
- Monitored team KPIs (adherence, average handling time, QA, attendance); built and maintained daily/weekly performance and reporting trackers, and ran performance meetings with leadership.
- Reviewed and corrected agent documentation for compliance; handled backend case escalations and supported new tool rollouts, including training new hires.

Customer Service Representative, Prior Authorization

Nov 2020 – Nov 2022

Optum

- Processed 30–50 inbound prior authorization requests per day from providers by phone and fax across 8 U.S. states; verified patient insurance eligibility, provider details (NPI, TIN), and CPT codes against internal systems.
- Determined and communicated authorization outcomes (no PA required, approved, or routed for RN review); handled urgent, out-of-network, peer-to-peer, and out-of-state requests, and assisted patients directly with questions on PA status, referrals, and Part B coverage.

CERTIFICATIONS & TRAINING

- HIPAA Certified, Biologix (2024, renewed 2026). Virtual Assistant Training: Ready To Round, 360MVA, VA Of The Future (2024).

EDUCATION

Bachelor of Science in Computer Engineering, STI College Surigao (Aug 2019)
